

# Specifications EN5 Series

Multi-Chamber  
Silencers

EN5 Series Engine Exhaust Silencers are heavy duty, fully welded units constructed of carbon steel sheet and plate. Sizes 1" - 3½" are equipped with standard male pipe thread connections. Size 4" and larger have flanged connections drilled to match 125/150 lb. ANSI specifications. Exterior surfaces receive a coat of heat resistant paint.

The addition of "Y" in the model designation indicates a side inlet. Both configurations are fundamentally alike and performance is identical.
