

# Specifications ET2 and ET4 Series

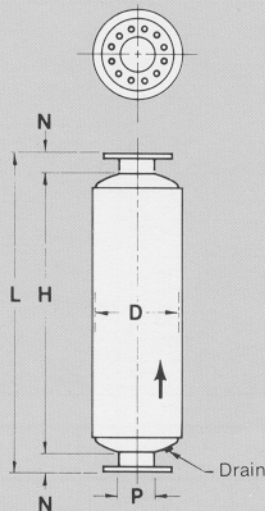

Straight-Thru  
Silencers

Typical Attenuation Curves

ET2 and ET4 Series Engine Exhaust Silencers are heavy duty, fully welded units constructed of carbon steel sheet and plate. Each silencer is equipped with flanged connections drilled to match 125/150 lb. ANSI specifications. Exterior surfaces receive a coat of heat resistant paint.

Due to low back pressure requirements, no side inlet configuration is cataloged. In some special cases side inlets may be designed on application.
